

Sara Ahmadi | Business Intelligence Analyst

Ottawa, ON, Canada | (+1) 343-777-9665 | ahmadi.sa1368@gmail.com | www.linkedin.com/in/saraahmadi90

OVERVIEW

Business Intelligence Analyst and Power BI Developer with 6+ years of experience in business reporting, operational analytics, data visualization, and data-driven decision support. Skilled in developing automated Power BI dashboards, KPI reports, semantic models, DAX measures, and Power Query transformations using data from multiple sources. Experienced in gathering business requirements, improving data quality, automating reporting processes, and translating complex data into clear, actionable insights for cross-functional stakeholders. Knowledgeable in ETL, relational databases, data warehousing, dimensional modeling, and star and snowflake schemas.

CORE SKILLS

- **Power BI Development:** Power BI Desktop, DAX, Power Query, semantic models, interactive KPI dashboards, executive and ad hoc reporting
- **Data Modeling & Warehousing:** dimensional modeling, star and snowflake schemas, fact and dimension tables, relationships, cardinality, slowly changing dimensions
- **ETL & Data Integration:** ETL processes, data transformation, multi-source data integration, data pipelines, relational databases, data validation
- **SQL & Analytics:** MySQL, complex queries, joins, data extraction and manipulation, trend analysis, segmentation, forecasting
- **Dashboard Design:** data visualization, visual hierarchy, business storytelling, stakeholder-focused reporting
- **Reporting & Data Quality:** reporting automation, QA checks, metric definition, data accuracy, process documentation, Advanced Excel
- **Programming & Tools:** Python, Pandas, Microsoft 365, Jira, Git/GitHub
- **Business Collaboration:** requirements gathering, stakeholder communication, cross-functional teamwork, data-driven decision support

PROFESSIONAL EXPERIENCE

Product Data & BI Analyst | SternXTech | Nov 2019 – Apr 2023

SternXTech develops Safes, a parental-control platform focused on children's online safety.

- Developed and maintained automated Power BI dashboards tracking conversion, retention, churn, renewals, revenue, and product engagement, reducing manual reporting time by approximately 40%.
- Analyzed the end-to-end subscription funnel—from installation and signup through trial, paid conversion, and renewal—to identify performance trends, conversion gaps, and retention opportunities.
- Cleaned, transformed, consolidated, and validated 20,000+ records from multiple product and subscription data sources using Python and Pandas, improving data accuracy and reporting consistency.

- Gathered reporting requirements from Product, Marketing, and Engineering stakeholders and translated them into Power BI dashboards, KPI reports, and actionable business insights. Standardized KPI definitions, reporting templates, and data quality checks, improving metric consistency and reducing duplicate reporting requests.
- Investigated customer behavior, product usage, and post-release application performance to explain KPI changes and support product and operational decisions.

BI Analyst, Sales and Operations | Noortec | Feb 2017 – Oct 2019

Industrial Machinery Company specializing in equipment sales, after-sales service, spare parts, and consumables.

- Developed and maintained monthly sales, revenue, margin, and operational performance reports in Microsoft Excel using data extracted from Odoo ERP and CRM, improving business visibility and reducing manual reporting effort.
- Built KPI-driven reports and analyzed account performance, revenue trends, product demand, and purchasing patterns to support Sales and Operations planning.
- Performed customer segmentation and account-level analysis to identify high-value customers, churn risks, and cross-sell and upsell opportunities across machinery, services, spare parts, and consumables.
- Forecasted demand for consumables and critical spare parts and communicated actionable insights to 10+ stakeholders, contributing to an approximately 15% reduction in stockout-related disruptions.
- Gathered reporting requirements from Sales, Operations, and management stakeholders and translated business needs into recurring and ad hoc reports.
- Improved reporting reliability by validating sales and operational data, performing accuracy and QA reviews, and standardizing KPI definitions and reporting processes.

EDUCATION

- **Master of Engineering Management** — University of Ottawa, Canada | Sep 2023 – May 2025
- **Bachelor of Industrial Engineering** — Islamic Azad University, Iran | Sep 2008 – Dec 2011

CERTIFICATIONS

- Microsoft Power BI Data Analyst Professional Certificate — Microsoft
- Google Business Intelligence Professional Certificate — Google
- Data Analysis with Pandas and Python — Udemy
- Advanced SQL for Analytics and Business Intelligence — Maven Analytics
